

PAVAN RAWAT

Java Developer | Microservices Expert | Spring Boot Specialist | Team Leadership

+91-8269065672 • pavanrwt.official@gmail.com • Pune, India

Summary

Software Engineer with 5+ years of experience in designing and delivering enterprise applications, with a focus on the airline cargo domain. Specialised in building scalable micro services using Java and Spring Boot. Proven ability to translate complex business needs into high-performance, domain-driven solutions that enhance operational efficiency and customer value.

Skills

Tech Stack:

Java • Java 8/11 • Node.js • Spring • Spring Boot • JUnit • RDBS • Hibernate • Microservices • Multithreading • J2EE • REST • Lambda • XML • System Design • Servlets • SQL • HTML • jQuery • Core Java • Data Structure • React • Angular

Data Engineering: PostgreSQL • Oracle • MySQL • MongoDB • Kafka • Hadoop

Development: Eclipse • Maven • CI/CD • AWS • Postman • GIT • Scrum • Jenkins • Spring Cloud • Software Development Life Cycle(SDLC)

Experience

Capgemini

Pune, India

Consultant

06/2026 - Present

Contributed to the development of card management solutions by implementing secure REST APIs and backend services using Java and Spring Boot.

- Backend Java Developer responsible for developing and maintaining microservices for card management applications, designing secure REST APIs, integrating with banking systems, and supporting production deployments using Java, Spring Boot, Oracle, and CI/CD.
- Technologies Used:** Java, Spring Boot, Microservices, REST APIs, Oracle, Spring Security, SQL, Git, Maven, Jenkins, CI/CD, Docker, AWS, Agile Methodologies.

Accelya Group (Product-Based Company)

Software Development Engineer II

02/2023 - 06/2026

Developed and maintained the Cargo Reservation Booking System (Skychain)

- Designed and developed **scalable microservices architecture** using **Java, Spring Boot, and REST APIs**, improving processing speed by **30%**.
- Built backend services for **booking, pricing, and tracking systems**, ensuring **high availability and concurrent transaction handling**.
- Developed **event-driven real-time data pipelines using Apache Kafka**, enabling faster data processing and near real-time insights.
- Implemented **secure authentication and authorization** using **Spring Security and JWT-based role access control**, reducing unauthorized access by **40%**.
- Optimized system performance through **modular microservices design and efficient data handling**, reducing response time by **25%**.
- Designed and maintained **RESTful APIs with reusable and extensible architecture** for seamless system integration.
- Built and deployed applications using **Docker and AWS**, ensuring scalability and reliability of services.
- Implemented and improved **CI/CD pipelines using Jenkins, Maven, and Git**, streamlining build and deployment workflows.
- Technologies Used:** Java, Spring Boot, REST APIs, Microservices, Angular/React, Apache Kafka, Oracle, PostgreSQL, Spring Security, JWT, Docker, AWS, Jenkins, Maven, Git, CI/CD, WebLogic, Agile Methodologies.

Accelya Group (Product-Based Company)

Software Development Engineer I

01/2022 - 02/2023

Developed and maintained Identity and Access Management (IAM), a centralized system for secure enterprise authentication.

- Designed **OAuth2 and JWT-based authentication flows**.
- Integrated **MFA and Single Sign-On (SSO)**.
- Secured user credentials using **bcrypt hashing**.
- Created **LLD** for scalable, secure **IAM** components.
- Technologies Used:** Java, Spring Boot, REST APIs, Microservices, Angular/React, Apache Kafka, Oracle, PostgreSQL, Spring Security, JWT, Docker, AWS, Jenkins, Maven, Git, CI/CD, WebLogic, Agile Methodologies.

Key Achievements

- **Cargo Processing Optimization**
Increased cargo processing speed by 40% through optimized microservices.
- **Enhanced App Security**
Implemented JWT authentication, enhancing app security by 50%.
- **Reduced API Response Time**
Reduced API response time by 30% using efficient coding practices.

SOFT SKILLS

- **Project Management**
Managed projects for 5+ clients throughout the Software Development Life Cycle, demonstrating strong project management, problem-solving, analytical thinking, team leadership, ability to think beyond routine approaches, proactive problem identification, and collaboration in software engineering communities, while fostering a culture of diversity, equity, inclusion, and respect.

Education

Oriental Institute Of Science And Technology
B.E. Information Technology

Bhopal, India
08/2015 - 09/2019
